## Encoder Specs for Registrix Live

In order to get the information for the encoder using the Registrix Live channels, Click on the Profile located to the upper right corner and select from the Drop Down Broadcast.

The next window that appears will contain the RTMPS or RTMP information and the Stream Key. This information must be entered 100% exactly the same or the stream will fail.

Registrix Live service requires that you use the following:

---

| <b>Settin</b>     | <b>Value</b>                                    |
|-------------------|---|
| <b>g</b>          |   |
| Keyframe Interval | 2   |
| Encoder           | x264  |
| Tune              | zerolatency                                     |
| Profile           | main  |
| CPU Usage         | veryfast  |
| Rate Control      | CBR   |
| Bitrate           | 720p - upto 4500 kbps<br>1080p - upto 8500 kbps |
| FPS               | 30 or 60  |
| Audio BitRate     | AAC<br>up to 320 kbps                           |
| Sample Rate       | 44.1 khz or 48 khz                              |
